English · B2 (worked in London)
Spanish · basic

Daniel Balloi

IT Project & Release Manager

LOCATION
Cagliari, Italy

GITHUB
github.com/danielballoi

PORTFOLIO ONLINE
danielballoi.github.io

PROFILE

Release & Delivery Manager with 3+ years of experience on banking and payments projects.

I come from software development, and I believe that to be a good manager you need to know "hands-on" the technologies your teams work with. That is why I built personal projects with AWS, Docker, Terraform, Kubernetes and Argo CD, which you can find in the Projects section of my online portfolio: https://danielballoi.github.io/#progetti

My goal is to understand clearly what developers are saying and to translate it for the business, stakeholders and non-technical teams. I hold the PMI CAPM and AWS Certified Solutions Architect – Associate certifications.

EXPERIENCE

Release Manager | Software Developer
Jan 2023 – Jun 2026
Stackhouse S.r.l. (Spindox group) · Cagliari

Release Manager · Payments and banking client
Apr 2023 – May 2026

I led the rollout of a new platform across a network of tens of thousands of points of sale, and the management of thousands of releases through to steady state, coordinating technical teams, business and stakeholders.

- Managed the end-to-end bug-fix lifecycle: from the ServiceNow ticket to Jira tasks, to the release request to the CAB, through to the release with DevOps and DBAs and monitoring in the following days via the control room.
- Planned and tracked releases across multiple environments (test, pre-production, production) for backend microservices, frontend components and POS firmware, with gradual rollouts (canary releases) and risk mitigation plans.
- Acted as the link between technical teams, business, stakeholders and L1/L2 support, meeting deadlines and milestones with detailed waterfall-style planning.
- Prepared Excel reports and charts for stakeholders to analyse fix trends and release quality.
- Worked closely with DevOps, with first-hand understanding of the CI/CD pipelines and of the integration between pipelines, change management (ServiceNow) and Jira.

Project Manager · Energy sector client
Dec 2024 – Jun 2025

Project Manager on an internal software project for an energy sector client, run alongside consulting work: project charter, planning with Gantt chart, periodic progress reports (SAL), epics, tasks and bugs in Jira, roadmap, progress tracking and support to developers in removing blockers. JavaScript/React software with MongoDB.

Developer · Betting sector client
Feb 2023 – May 2023

Code analysis, bug fixing and application maintenance for betting apps, in Java and Spring Boot.

Developer · Corporate welfare client
Jan 2023 – Mar 2023

Maintenance and bug fixing on electronic invoices; databases with SQL and use of PL/SQL.

Backend Software Developer Intern
Oct 2022 – Dec 2022
Televideocom Srl · Cagliari

End-to-end backend project developed independently: logic design, implementation and management of the development cycle, in Java and Spring.

Bartender
2018 – 2019
Stonegate Group · London, United Kingdom

Fast-paced international environment: daily English and teamwork.

AVAILABILITY

On-site or hybrid in Cagliari
Full remote across Italy
Available for business travel
Own car
Night work available

PERSONAL PROJECTS

- **FrigoChef:** phone web app that suggests feasible recipes from a photo of your fridge. Docker containers, GitHub Actions pipeline with images on a registry, local Kubernetes, GitOps-style delivery with Argo CD, v0.1.0 release and rollback tested with git revert. App built with the help of an AI assistant; infrastructure, pipeline and GitOps done by me.
- **Balloi immobiliare:** real-estate investment dashboard for Cagliari brought to production in a professional way: Docker, CI/CD with GitHub Actions, versioned releases, AWS infrastructure in Terraform, backups on S3.
- **Online portfolio:** personal site with the project documentation, published with GitHub Actions and AWS infrastructure managed with Terraform (danielballoi.github.io).

I managed these projects as real projects, producing project charters, functional analysis, roadmaps, risk registers and lessons learned. All of this is visible in my online portfolio: https://danielballoi.github.io/#progetti

I authorise the processing of the personal data contained in this CV pursuant to EU Regulation 2016/679 (GDPR) and Italian Legislative Decree 196/2003, as amended.
